

## Jupiter Volta's Fertilizer Plant™ A complete fertilizer production plant, powered by Plasma Forge®!

## Nitrogen: Anywhere, on Demand, from Electricity!

### Lowest Landed Cost:

Achieve industry-leading landed costs as low as \$250/tonne  
Scale seamlessly with modular architecture for high-volume output  
Bypass traditional supply chains for an immediate economic advantage

### Rapid Deployment:

Reach full production capacity in under six months  
Tailor production output to meet your exact operational requirements  
Operate sustainably with 100% zero-emission production

### Fully Supported Operations:

Rely on comprehensive, hands-off maintenance management  
Benefit from continuous, data-driven process optimization

## Jupiter Volta Fertilizer Plant™ - Deployed in months, not years!

3 Tonnes per Day (In service now)

300 Tonnes per Day
